Online Coding Competition Instructions for Participants

.....
.....
Welcome to the Online Coding Competition! This document provides you with important instructions and guidelines to ensure a smooth and fair competition experience. Please read through these instructions carefully before you begin.

1. Competition Schedule:

The competition will start on **19.02.2026** at **12 noon**.

2. Registration:

If you haven't already registered for the competition, please make sure you have completed the registration process before the competition starts. Only registered participants will be eligible to participate.

3. Platform:

Round 1: Coding Challenge

- **Platform:** HackerRank (Click the "Get Started" button to begin From the Website).
 - o **Number of Problems:** 50 MCQs (2 marks each) and 10 Programming questions (10 marks each)

Full Marks: 200

4. Accessing the Competition:

On the day of the competition, log in to your account on the competition platform. You will find a link to access the competition environment. **Click on the Link to enter the competition.**

5. Competition Duration:

The competition will run for **90 minutes**. You will have this entire duration to complete the coding challenges provided.

Please manage your time effectively to attempt all the challenges.

6. Coding Languages and Tools:

You are allowed to use the following programming languages: **C & C++ & Python & Java.**
Make sure you are familiar with the syntax and features of the assigned language.

7. Challenge Types:

Round 1 will consist of 50 MCQs carrying 2 marks each and 10 Programming questions carrying 10 marks each, making a total of 200 marks. The questions will cover various difficulty levels ranging from easy to advanced. Participants are advised to read all problem statements carefully before attempting the questions.

8. Submission:

For each challenge, you will need to select an answer to solve the given problem. Once you've completed your solution, submit the coding problem. **Late submitted code will not be considered for evaluation.**

9. Evaluation:

Your response will be evaluated manually by the expert based on predefined test questions.
Make sure your answers handle different scenarios correctly.

10. Communication:

Any queries or issues during the competition can be addressed through the chat.

Note : Make Sure You have Internet , Desktop or Laptop because it is a Online Coding Contest.
